

Algorithms

check if the given number is Even or ODD

Flowchart →

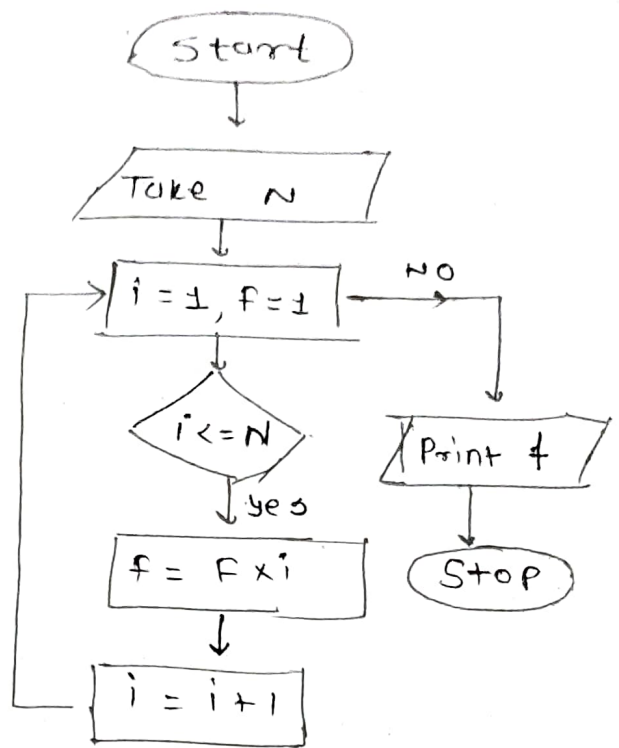

Pseudo Code →

- 1) start
- 2) take input
- 3) Check no. give remainder zero by two
- 4) output
- 5) end.

2) Factorial of Given number.

- i) start
- ii) Input number n , $fact = 1$
- iii) ~~A fact~~ a) If $n \geq 0$ then
 $fact = fact \times n$
- iv

4) Swapping the number.

How chart

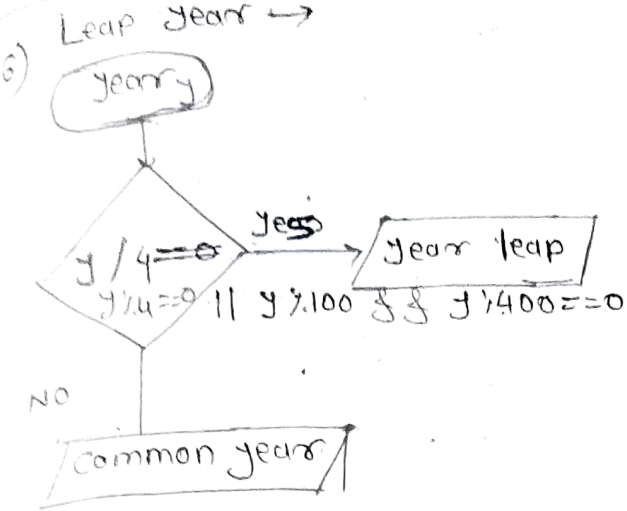

Pseudo Code

- 1) start
- 2) Take input of number a, b .
- 3) Calculate $a = a + b$ then $b = a - b$
 again $a = a - b$.
- 4) ~~print~~ print output swap the number
- 5) End.

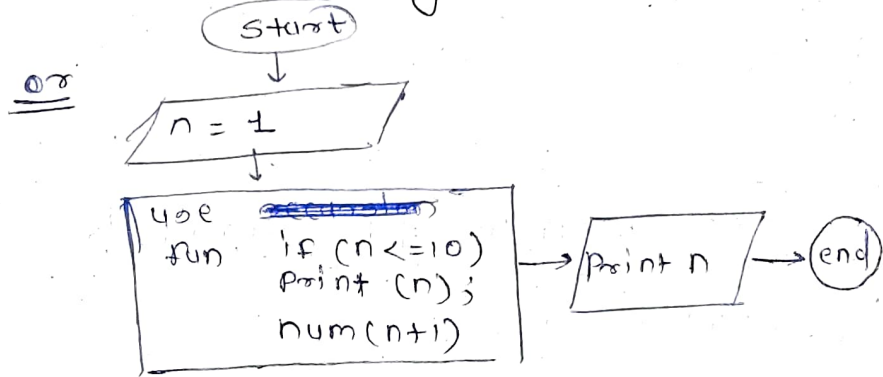

9284671730

~~9869860176~~

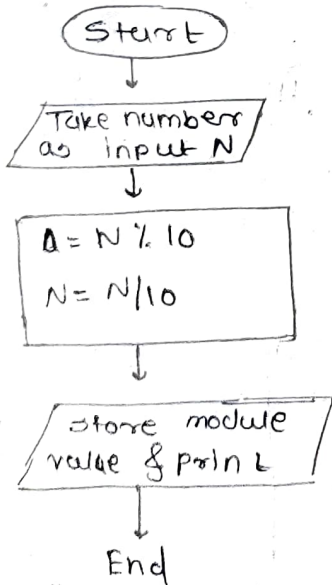

- 1 pseudo code.
- 1) Start
 - 2) Take input year.
 - 3) IF year / 4 get remainder non-zero year is common year
 - 4) IF remainder is zero then year / 100 or year / 400 get remainder zero then year is leap year.
 - 5) output the year leap or not
 - 6) End.

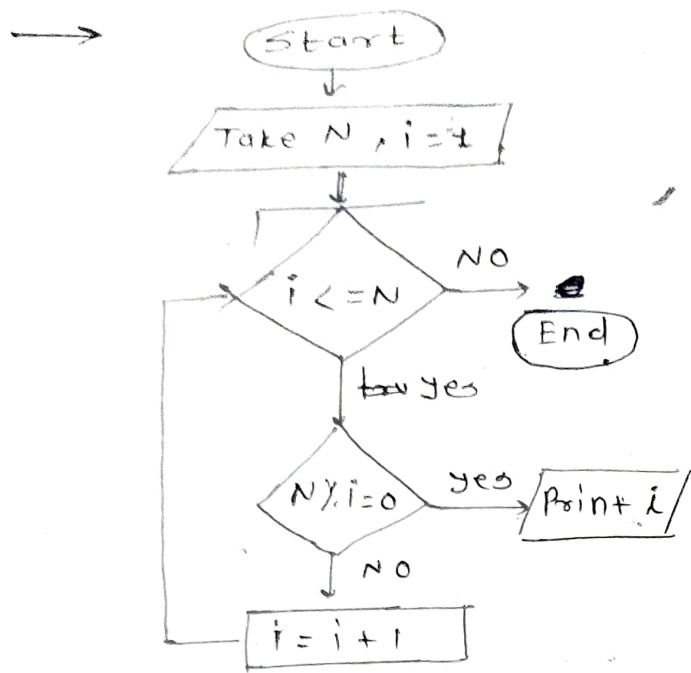

7) Algorithm to print 1 to 10 without using loop

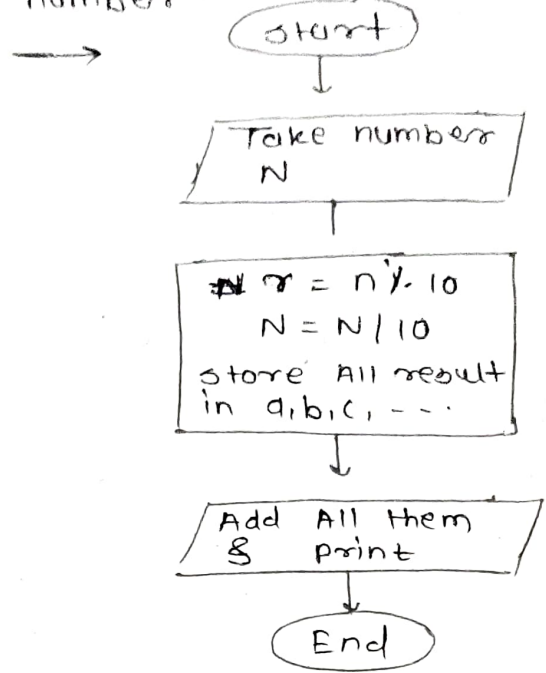

8) Print the digit of Given numbers.

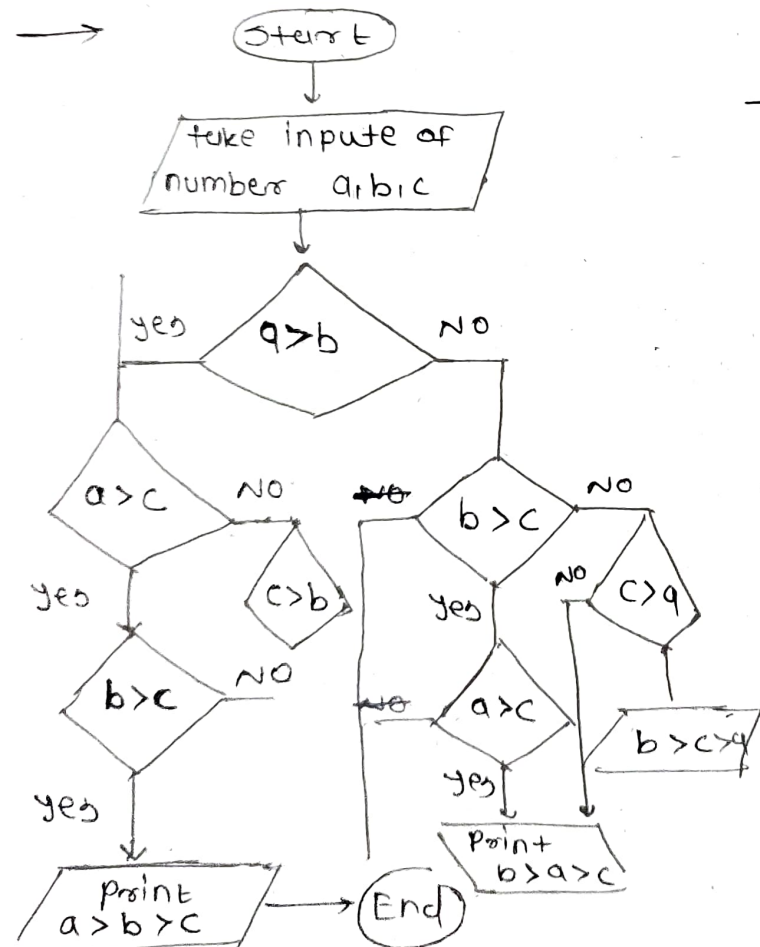

9) Factor of Given number

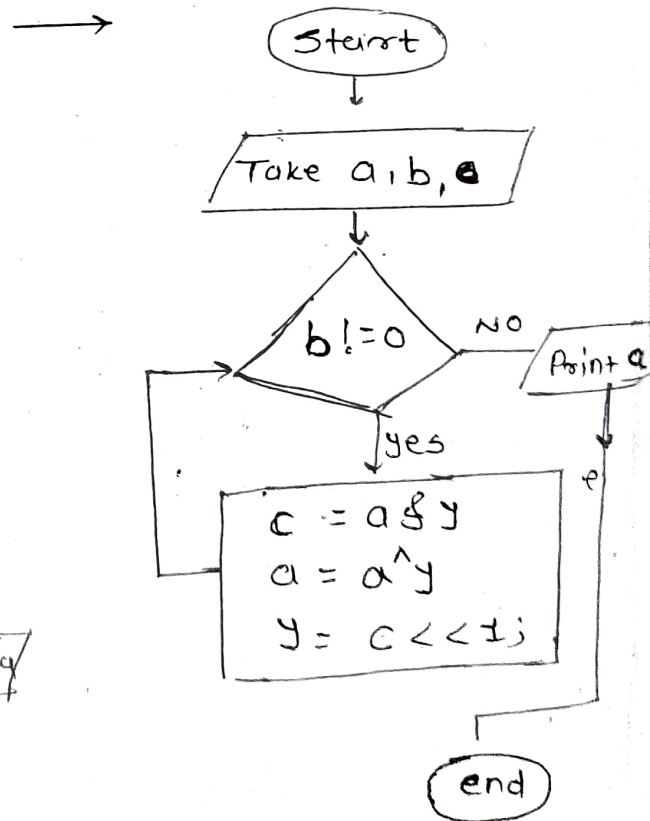

10) Find sum of digit of Given number

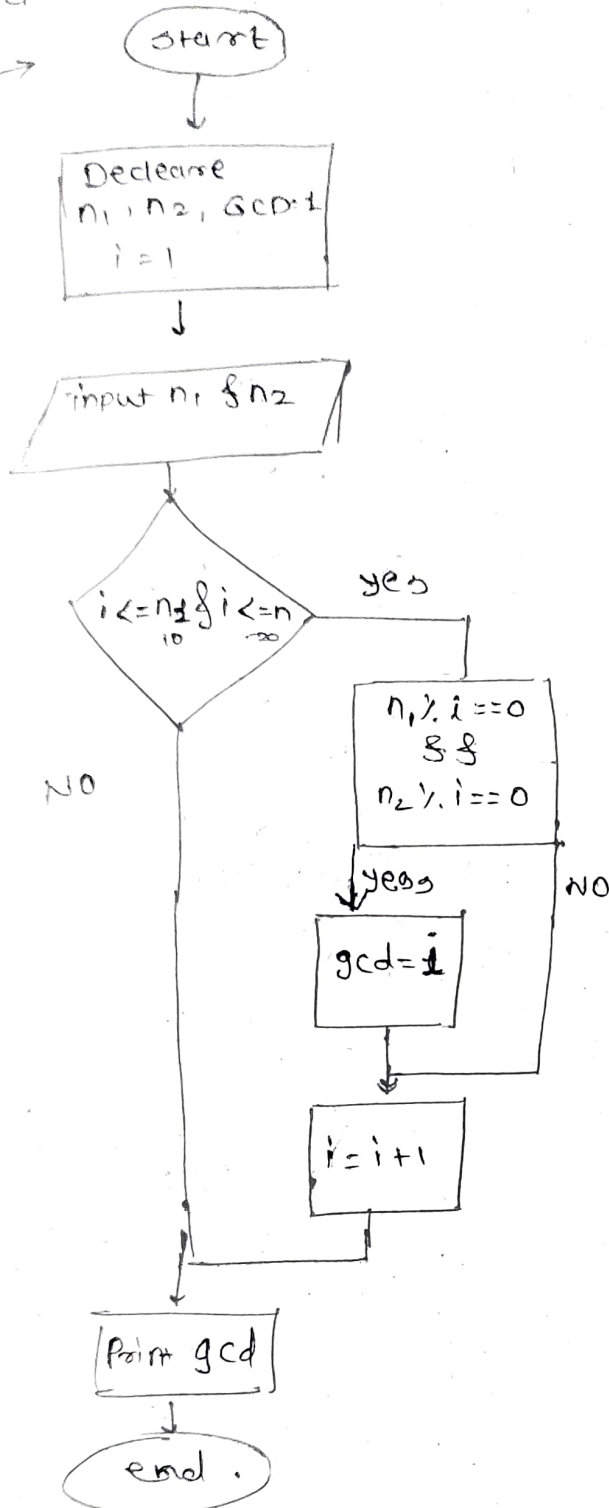

11) smallest of 3 number

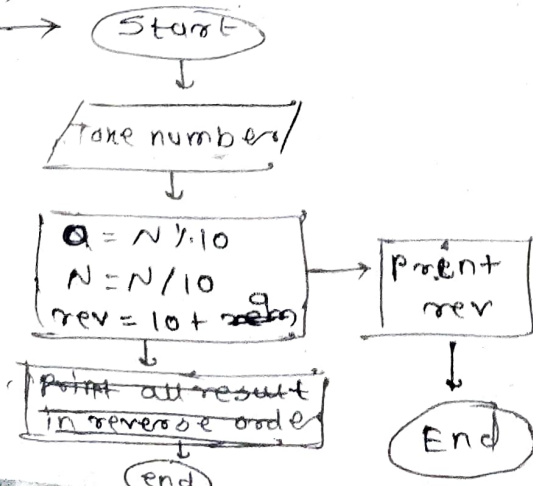

12) Add two number without using arithmetic operation

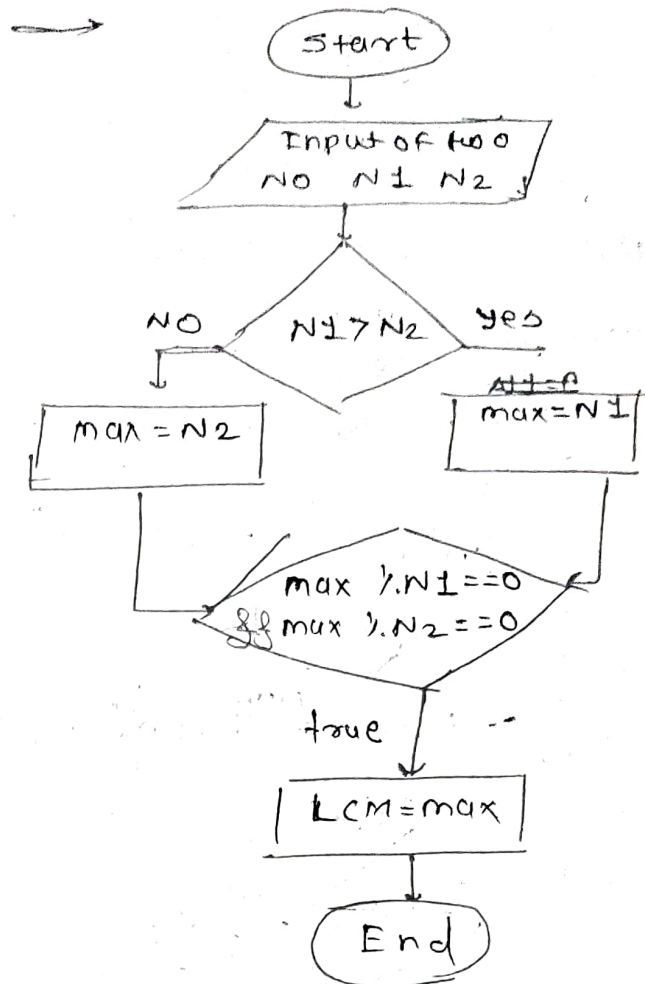

14) GCD of two numbers

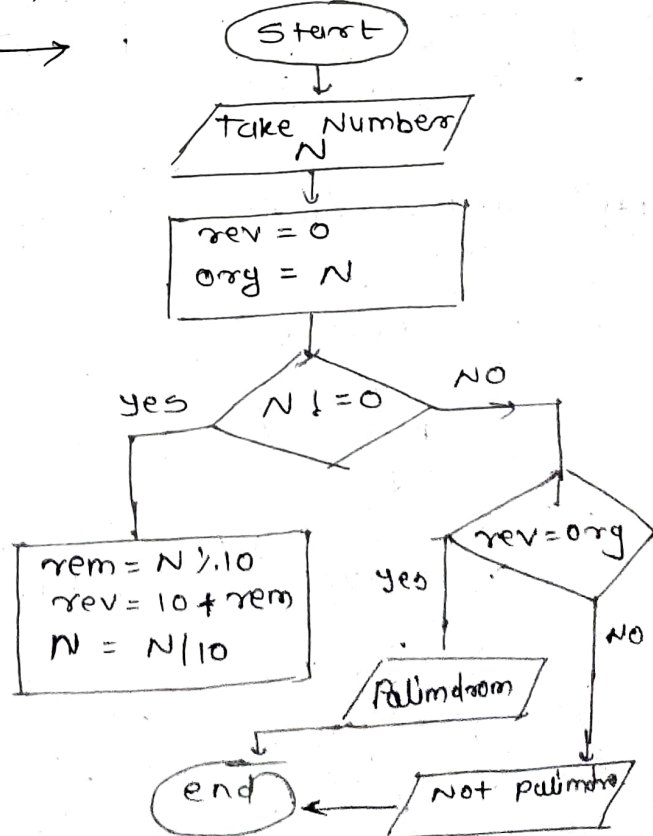

13) Reverse of Number.

15) LCM of two numbers

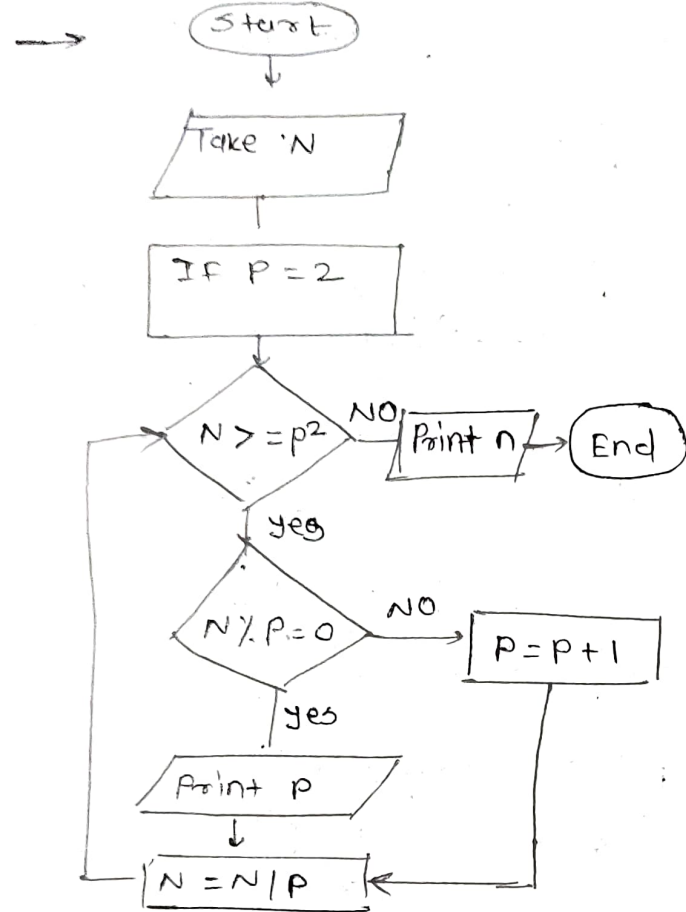

16) Palindrom.

17) Palindrome or not.

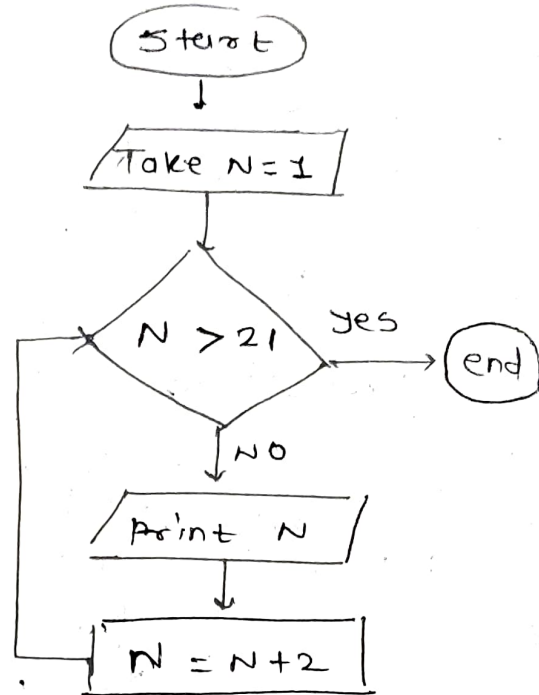

18) Prime number factor

20) Print odd no. of series

1, 3, 5, - - - -

19) Print Even no. of series.

2, 4, 6, 8, - - - -
